Detective

MPU - Missing Persons Unit

MPU - Missing Persons Unit

The MPU is a team of highly trained professionals who have dedicated their lives to tracking down and rescuing missing people. Despite having completely different personalities, the team's members fuse into an invincible unit - often the last hope for the victims' desperate families.

Walter, the leader of the MPU, is dead-set on finding those missing and reuniting them with their families. Since an unsuccessful case 10 years ago when he was unable to save the life of a child abducted by a pedophile, Walter has been determined to never fail again. However, that case still plagues his conscience.

Meanwhile, Walter's right hand Tine is hard-pressed to find the right balance between raising her two kids and her stressful and demanding job.

Tine's colleague Nick, on the other hand, feels so passionate about his work that he is often willing to ignore the law in order to rescue a victim. It is just that attitude, though, that frequently draws the wrath of the authorities.

Then there is Steve, the unit's computer specialist and resident joker, who often resorts to humor in the most inappropriate situations. The team is joined by the rookie Mily, whose difficulty coping with the harsh reality of the field is a far cry from the relative ease of her past work in the crime lab.

The unit's most pressing goal is to get to the missing people before it is too late. When a 16-year-old girl disappears, some members of the team initially agree with the police that she has simply run away. Soon, though, it becomes clear to the MPU that foul play was involved.

MPU - Missing Persons Unit

Following their hard-wired instincts, the unit rescues the kidnapped girl from the horrific destiny of forced prostitution. In another case, the team saves an abducted girl's life with the help of illegally obtained evidence. Despite the mission's success, the case causes conflict in the unit because of Walter's strict policy of following regulations...

MPU - Missing Persons Unit
