MegaClever!

MegaClever!

“Clever!” gets huge! “MegaClever!” cranks the successful and unique edutainment format up to a brand new level of intensity... A spectacular show event with experiments on a scale never before seen on television, “MegaClever!” will have audiences marveling as one of the hosts experiences weightlessness on a jet plane in parabolic flight together with a group of real-life astronauts. They’ll anxiously hold their breath as “MegaClever!” pits a rifleman and a Japanese samurai swordfighter against each other in a test to see if the traditional sword will split a bullet in half. And “MegaClever!” will have them on the edge of their seats when daring motorcyclists attempt a dangerous world record as several of them perform insane loops and turns in a spherical steel cage not even 5 meters in diameter! Two teams of celebrities, separated into men and women, go head to head in trying to determine the right answers and explanations for tricky scientific questions and earn the honorary title of “MegaClever! Champions”. The celebrity guests will speculate with wild and wacky theories about the laws governing a vast assortment of everyday phenomena, which are then provedn... or disprovedn in tests that cover everything from physics to sociology. The question: Who really knows their stuff – the men or the women? Are guys really better at theoretical thinking? Or is it the famed female intuition that helps solve these difficult brainteasers? Such as, can a common domino topple a giant 6 x 8 meter concrete block? Perhaps, if you insert enough blocks of increasing size in-between... and how realistic are all those car explosions in the movies? Will a bullet to the tank really ignite the whole vehicle? “MegaClever!” will find out, testing it on model scale – and then determining the sometimes unbelievable truth with mind-boggling tests on the real thing. With every experiment and each right or wrong answer, the celebrity teams send lucky audience members on their way to the next round until only 3 candidates remain for the show’s spectacular finale, where one of them will win the highly coveted grand prize, possibly supplied by a sponsor or a lottery.
